The Honorable Charles Schumer Majority Leader U.S. Senate Washington, D.C. 20510

The Honorable Nancy Pelosi Speaker U.S. House of Representatives Washington, DC 20515 The Honorable Mitch McConnell Minority Leader U.S. Senate Washington, D.C. 20510

The Honorable Kevin McCarthy Minority Leader U.S. House of Representatives Washington, DC 20515

Dear Majority Leader Schumer, Speaker Pelosi, and Minority Leaders McConnell and McCarthy:

The COVID-19 pandemic has demonstrated that the nation's public health infrastructure and workforce, long neglected, are critical to the country's security and stability. The undersigned organizations urge you to include the Public Health Infrastructure Saves Lives Act (PHISLA, S. 674) in the infrastructure and jobs legislation to strengthen our nation's public health capabilities. The legislation would fill long-standing gaps in public health, enable modernization of archaic technologies and systems, and build a foundation for a more effective, efficient public health response to future pandemics.

The pandemic exposed the deadly consequences of chronic underfunding of basic public health capacity. The costs can be measured in over 600,000 lives lost in the U.S. alone, the largest drop in gross domestic product since 1946,¹ trillions of dollars in response and relief funding, and the closures of thousands of schools and businesses. Health agencies were gravely outmatched by the virus, responding to the outbreak with a depleted and exhausted workforce and archaic technologies. Local health departments have lost 21 percent of their workforce capacity since 2008,² while state health agencies lost nearly 10 percent of full-time equivalent staff since 2012.³ While supplemental funding has been critical to addressing the COVID-19 pandemic, most of these are not sustainable positions. Fire departments do not eliminate firefighters and equipment as soon as a blaze is contained; yet public health follows a repeated pattern of underfunding,

³ New Data on State Health Agencies Shows Shrinking Workforce and Decreased Funding Leading up to the COVID-19 Pandemic. ASTHO, Sept 24, 2020. https://astho.org/Press-Room/New-Data-on-State-Health-Agencies-Shows-Shrinking-Workforce-and-Decreased-Funding-Leading-up-to-the-COVID-19-Pandemic/09-24-20/

followed by supplemental funding and short-term hires, followed by retrenchment and layoffs. The result is lost expertise, failure to update neglected technologies, difficulty recruiting and retaining expert workforce, and an inability to address chronic health disparities.

PHISLA would establish a Core Public Health Infrastructure Program at the Centers for Disease Control and Prevention (CDC), awarding grants to state, local, Tribal and territorial health departments to ensure they have the tools, workforce, and systems in place to address existing and emerging health threats and reduce health disparities. PHISLA invests in the foundational capabilities of public health.⁴ Because public health is largely funded by disease or condition, there has been little investment in cross-cutting capabilities that are critical for effective public health. These capabilities include: public health assessment; preparedness and response; policy development and support; communications; community partnership development; organizational competencies; accountability; and equity. The legislation includes strong accountability measures through public health accreditation. The legislation dovetails with the public health workforce provisions of the American Rescue Plan (ARP), as PHISLA ramps funding up just as ARP money begins to expire.

Now is the time to learn the lessons of this devastating pandemic. We simply cannot prepare for 21st century health threats using 20th century public health tools. Congress has an opportunity to provide sustainable support to build a modern, ready public health system, rather than continue to react to disasters with short-term funding that only addresses the immediate crisis.

Sincerely,
